

CONNECTING THE GLB GEAR LEVER TO YOUR BODNAR CARD.

July 2012

I've done 5 of these this year and it's not difficult. Most people can get there heads around hooking up the Microswitches, but you can also light up the Knob LED as well from the card Because it has GND and 5vdc connections as well.

Red Arrows are 5vdc for LED

Black Arrows are GND For LED

Blue Arrow is Common GND For Switches

Brown & Yellow Arrows are Any Button Inputs for Microswitches.
