

GLB Flight Products

Providing Flight Simulator Products for enthusiasts worldwide!

www.geremy.co.uk

Press Release:

Friday 14th August

The Flight simulation community welcomes a new supplier with a difference; GLB Flight Products at www.geremy.co.uk. We provide excellent value parts and software for aviation enthusiasts worldwide. The introduction of GLB Visitors' Retail is an additional unique concept to allow site visitors to advertise their flight simulator parts where they will receive a 100% target market viewing.

GLB Flight Products at www.geremy.co.uk have a selection of real aircraft and simulation parts and are pleased to exclusively introduce our latest product: The Screw Dzus Fastener - an authentic looking dzus fixing that is of use, not just decorative, but screws the panel into a variety of types and thickness of material. This can revolutionise the way self build enthusiasts fix their panels. As well as this other exclusive product lines include the Yoke Clipboard, Flight Tracker Live, and our introductory line of Flight Management Computers from real aircraft.

Geremy Britton of GLB Flight Products said: "We have had fantastic early feedback from big brands and simbuilders alike, and we are proud to have finally brought the flight simulation community a totally new idea for the purchase and sale of simparts, as well as our exclusive company product lines. There is always something happening at GLB Flight Products"
